Building 1, Xuelin Shangyuan, Chengxiang Street, Xiaoshan District, Hangzhou, Zhejiang Province, China 311201

EDUCATION

Wuhan University (WHU)

Wuhan, China

Bachelor of Engineering in Computer Science and Technology

09/2022-06/2026(expected)

- Overall GPA: 3.6/4.0 (87.46/100) (Junior Year GPA: 3.92/4.0)

- Related Coursework:

Machine Learning and Pattern Recognition(91), Cyberspace Security(96), Digital Signal Processing(93), Software Engineering(90), Computer Graphics(94), Computer Networks(94), Big Data Analysis and Processing(94)

RESEARCH EXPERIENCE

Research on Adapting FARGAN-Based Speech Generation Models to Narrowband Speech

10/2025-present

Thesis Research, instructed by Prof. Weiping Tu, Wuhan University

- Conducted a comprehensive survey of 16 kHz speech generation models represented by FARGAN, including related architectures such as CARGAN and HiFi-GAN
- Developed an 8 kHz-adapted FARGAN model by resampling datasets, constraining parameters along the pitch-prediction path, and fine-tuning pretraining and adversarial STFT-window configurations; reduced model parameters by approximately 50% while maintaining perceptual speech quality, enabling deployment in narrowband communication scenarios such as satellite and telephony systems

Lupbook: Offline Interactive E-Textbook Framework

07/2025-08/2025

Summer Research, instructed by Associate Prof. of teaching Joël Porquet-Lupine, University of California, Davis

- Built a Bootstrap5-based hint module with JavaScript and Python; collaborated through GitLab and adopted team development practices
- Fixed and optimized the dynamic randomization mechanism across system components, enhancing module reliability and user interaction experience

INTERNSHIP EXPERIENCE

Hubei Chuda Intelligent Equipment Co., Ltd.

07/2024-08/2024

Summer Software Engineer Intern

- Developed a raw-material transportation intelligent system combining Python snap7-based PLC communication with OpenCV image processing, enabling real-time camera-based object recognition and automated gate control
- Built and maintained a WeChat-based online store to support product display, ordering, and user interaction

Computer Graphics, Wuhan University Undergraduate Course

02/2025-06/2025

Teaching Assistant, lecturer: Associate Prof. Xiaochen Wang, Wuhan University

- Provided academic support to over 50 students, addressing questions on key topics such as affine transformations, the Phong illumination model, and the Bresenham line rasterization algorithm
- Assisted the instructor in classroom management, including attendance tracking, quizzes, and assignment coordination; additionally contributed to grading final exams and compiling course grade statistics

EXTRACURRICULAR ACTIVITY

Minister of the Academic Department, Student Union of the School of Computer Science, WHU

2023

Undergraduate Global Competence Special Scholarship, WHU

2025

Invention Patent (Preliminary Examination Passed): Formation Method (Algorithm) for Crystal Material Architectural Decorations

2025

SKILL

Language Ability: Chinese Mandarin (Native), English (TOEFL iBT 101)

Programming Language: C++, Python, Java, JavaScript, HTML, MATLAB
